

Creating SD Cards for RAN 10

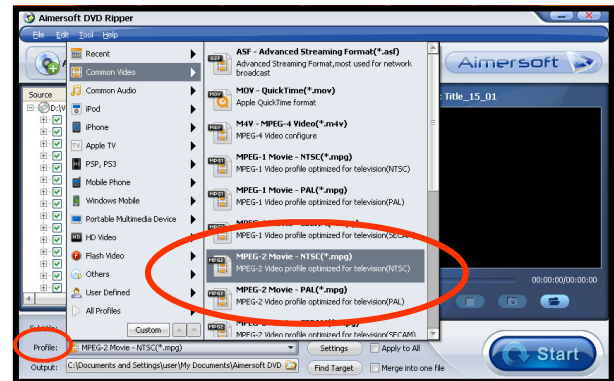

STEP 1: Go to www.aimersoft.com and download "DVD Ripper"

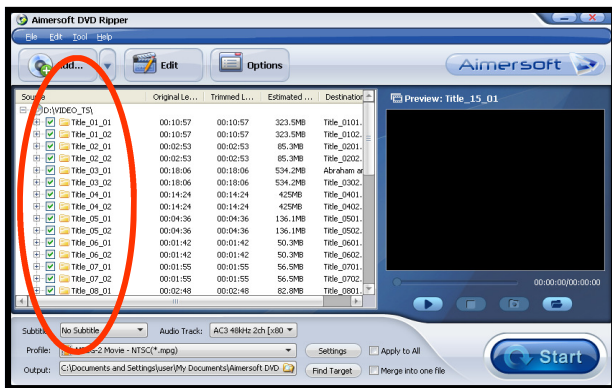

STEP 2: Insert DVD into computer. Open program and click "Add"

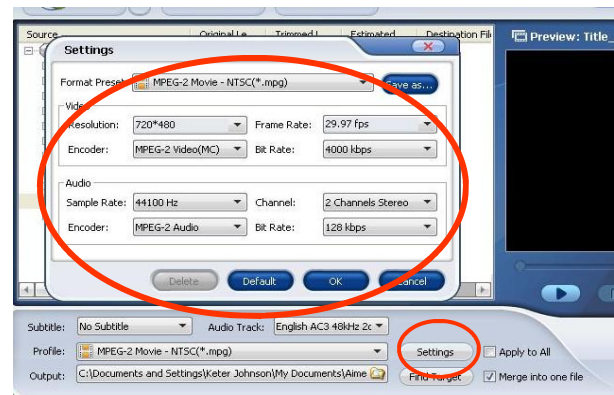

STEP 3: Select the DVD you wish to convert

STEP 4: Click the profile tab under "common files" and select "MPEG-2"

STEP 5: Select the files you wish to convert

STEP 6: Click "settings" button and adjust settings to match the above

If your computer does not have an SD slot then you may have to purchase an SD card USB converter. Available at www.amazon.com for under \$10

Once the following steps have been completed you are ready to begin converting! Simply hit the "Start" button and allow the program to finish converting the files. Next copy and paste or drag the files onto the SD card like you would a flash drive. The converted files will be located in the "Output" file: *Aimersoft DVD Ripper>Output*

*NOTE: Files larger than 1.5GB will not play. Breaking the file into smaller segments is necessary. To separate file in to smaller segments convert DVD by chapters. You also have the option to merge several chapters into one file if desired.
